

FORTKOTE™

AQUATIC RUBBER SAFETY SYSTEM

Poured-In-Place

FORTKOTE "Aquatic Rubber Safety System" is a seamless aquatic play area safety surface consisting of recycled tire rubber. Topped with E.P.D.M. (UV stable) rubber granuals, combined with a highly sophisticated polyurethane binder.

FORTKOTE enables indoor and outdoor aquatic facilities to be equipped in a most unique manner combining both a non-skid surface with a impact absorbing safety surface.

FORTKOTE uses advanced materials and a wide range of colourful designs to enhance new facilities and refurbish existing, fatigued and eroding ones.

FORTKOTE acknowledges the need toward the future awareness for new technology and innovative designs in aquatic safety surfacing. Making our company a specialist and leader in this field.

SPECIFICATION GUIDELINES PLAYSAFE: POURED-IN-PLACE

THICKNESS SELECTION	FALL HEIGHT
5mm-8mm	non-skid
